-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-10 and 38-48, drawn to a modeling of a configuration of components, classified in class 710, subclass 8.
 - II. Claims 11-37, drawn to a monitoring of a configuration of components, classified in class 710, subclass 18.
 - III. Claims 49-55, drawn to a computer readable medium using tags, classified in class 707, subclass 100.
2. Inventions I, II and III are directed to related products and processes. The related inventions are distinct if the inventions as claimed do not overlap in scope, i.e., are mutually exclusive; the inventions as claimed are not obvious variants; and the inventions as claimed are either not capable of use together or can have a materially different design, mode of operation, function, or effect. See MPEP § 806.05(j). In the instant case, invention I is meant to model whereas invention II is meant to monitor, which means operation is mutually exclusive. Invention III is a tag product, which is mutually exclusive from both modeling and monitoring. Thus invention I is not an

obvious variant of invention II or III and invention II is not an obvious variant of invention III. These three inventions can have different modes of operation as the three inventions do not necessarily have to be used together. A method can just model a system or it can just monitor/control a system. The tag data structure is not the same as a system or a method embodied in invention I or II.

3. Because these inventions are independent or distinct for the reasons given above and the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.

4. No telephone call was made because the examiner has deemed that the requirement for restriction is complex (see MPEP § 812.01).

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Vincent Lai whose telephone number is (571) 272-6749. The examiner can normally be reached on M-F 8:00-5:30 (First BiWeek Friday Off).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Fritz M. Fleming can be reached on (571) 272-4145. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
